

1. "Social Challenges" are here to stay

MISSION AREAS:

Soil health and food

Cancer

Adaptation to climate change, including societal transformation

Climate-neutral and smart cities

Healthy oceans, seas, coastal and inland waters

#HorizonEU

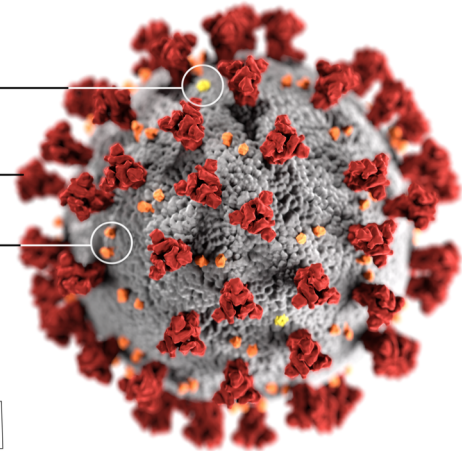

European Commission

E protein

S protein

M protein

COVID-19

NPI:
Washing hands,
masks,
Social distancing

2. We still don't have the kind of innovation ecosystems to deal with societal challenges.

1. Defense-driven
Challenges

-The Darpa Model

2. Market driven
Challenges

- "Business as
usual" model

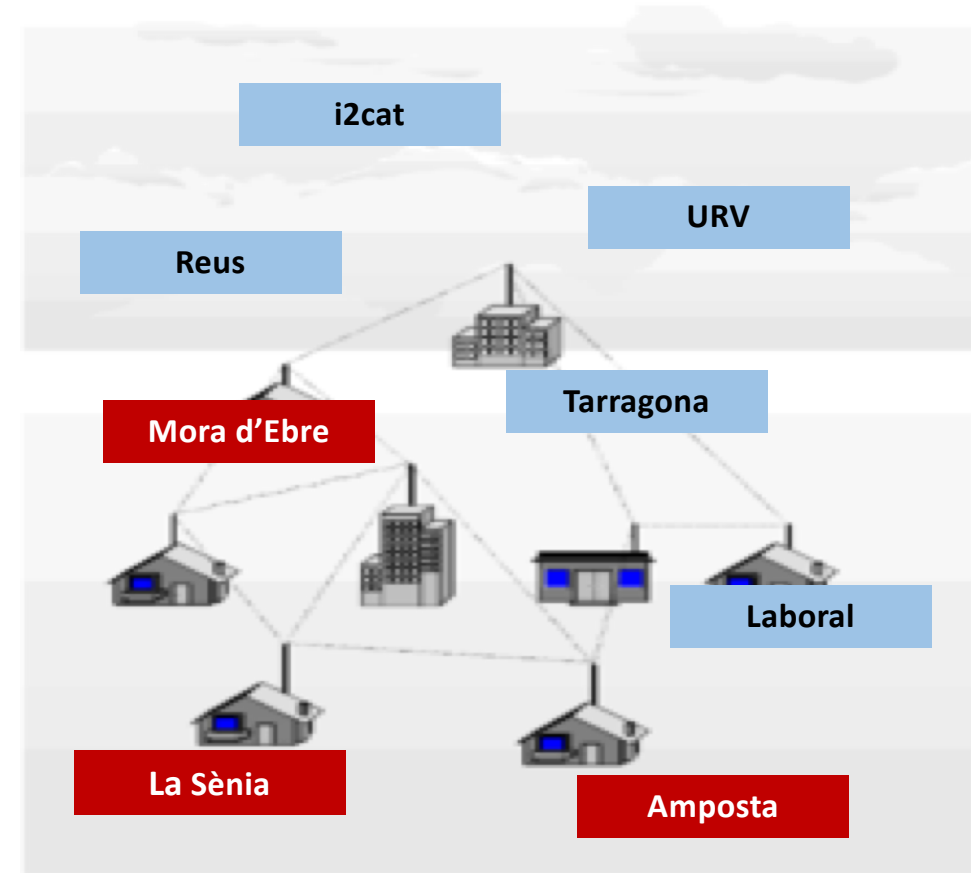

3. Societal-driven
Challenges

-¿Social Innovation
Ecosystems?

3. How about social innovation ecosystems?

1. Universal
2. More complex
3. More distributed
4. More secure
5. More productive

4. The Collaboratory CatSud: Territory matters

Promotors del Pilot del Col·laboratori a la Catalunya Sud

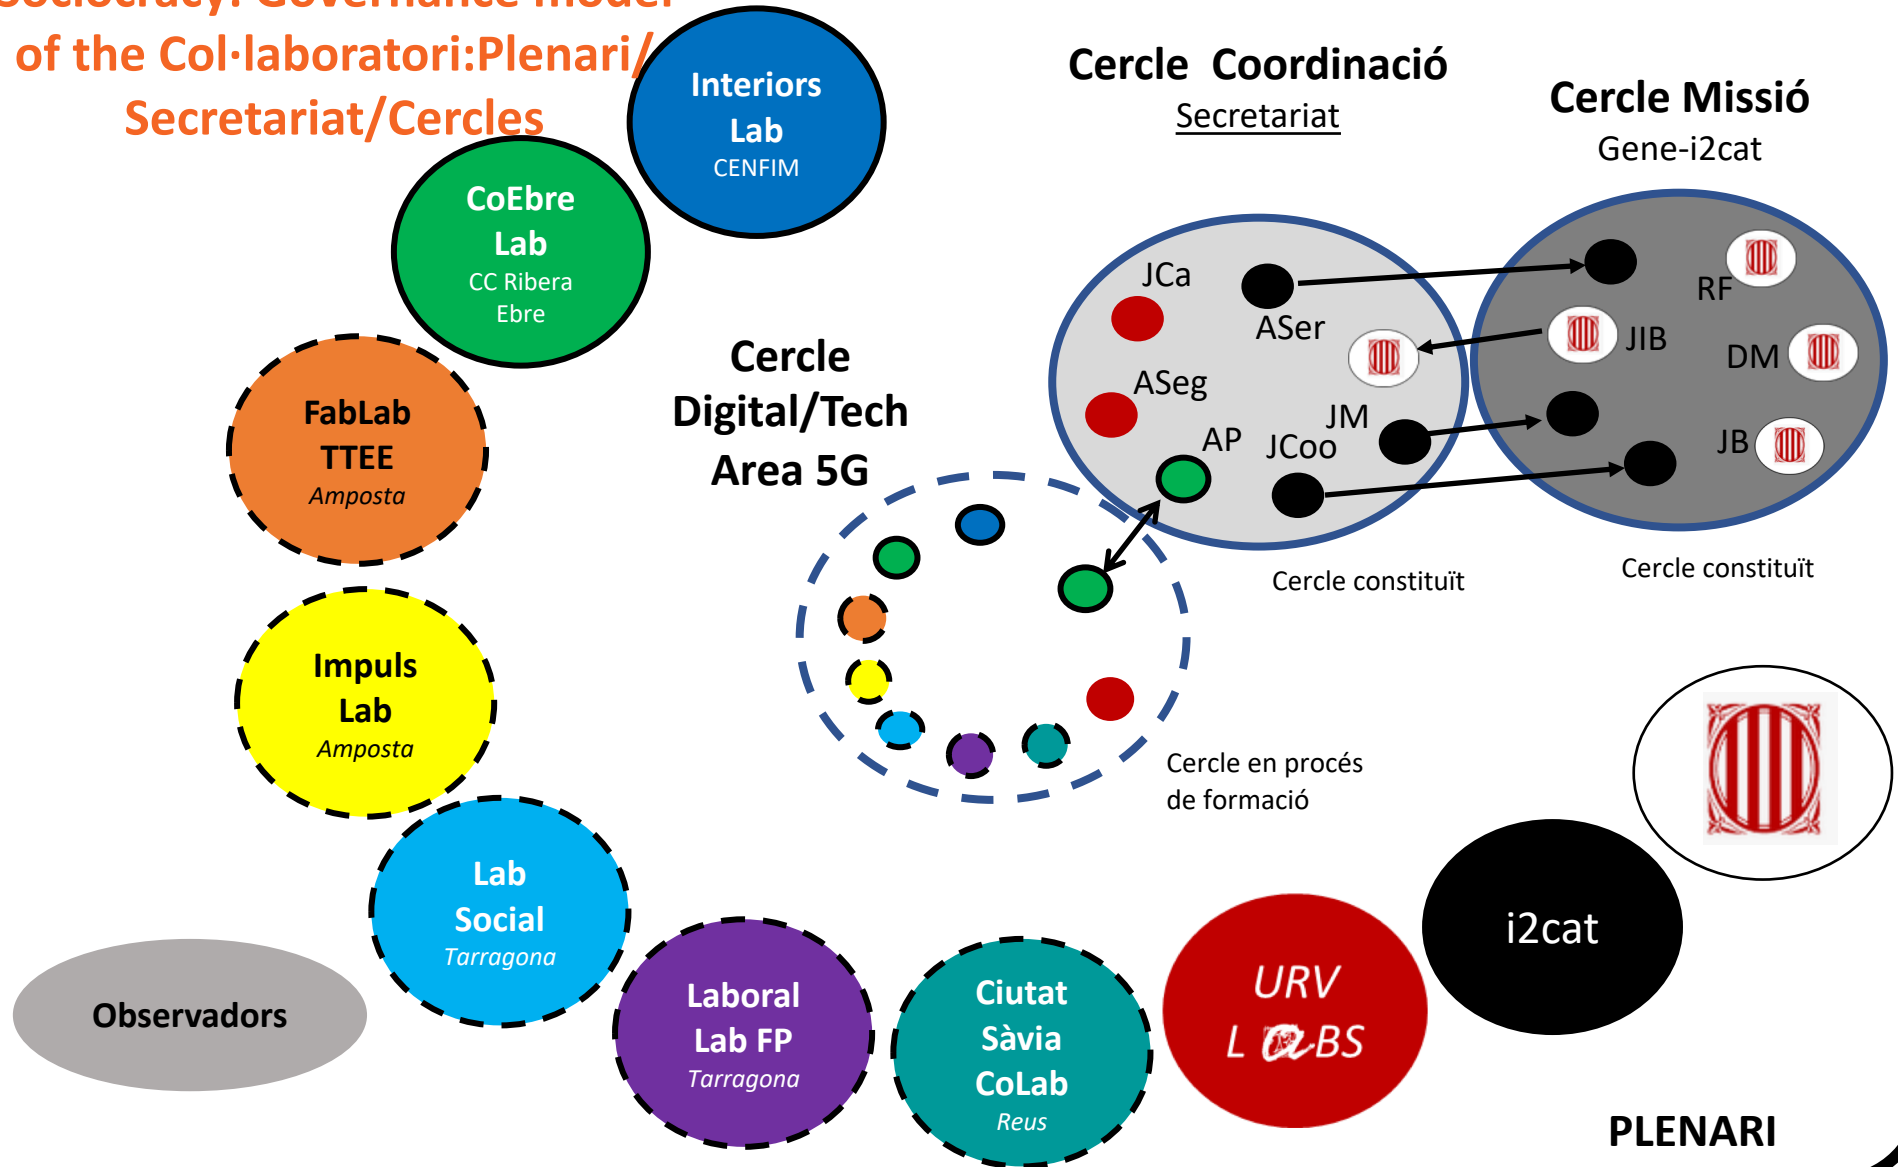

Promotors de la Iniciativa Col·laboratoris Catalunya

Labs del Col·laboratori a CatSud

Sociocracy: Governance model of the Col·laboratori: Plenari/ Secretariat/Cercles

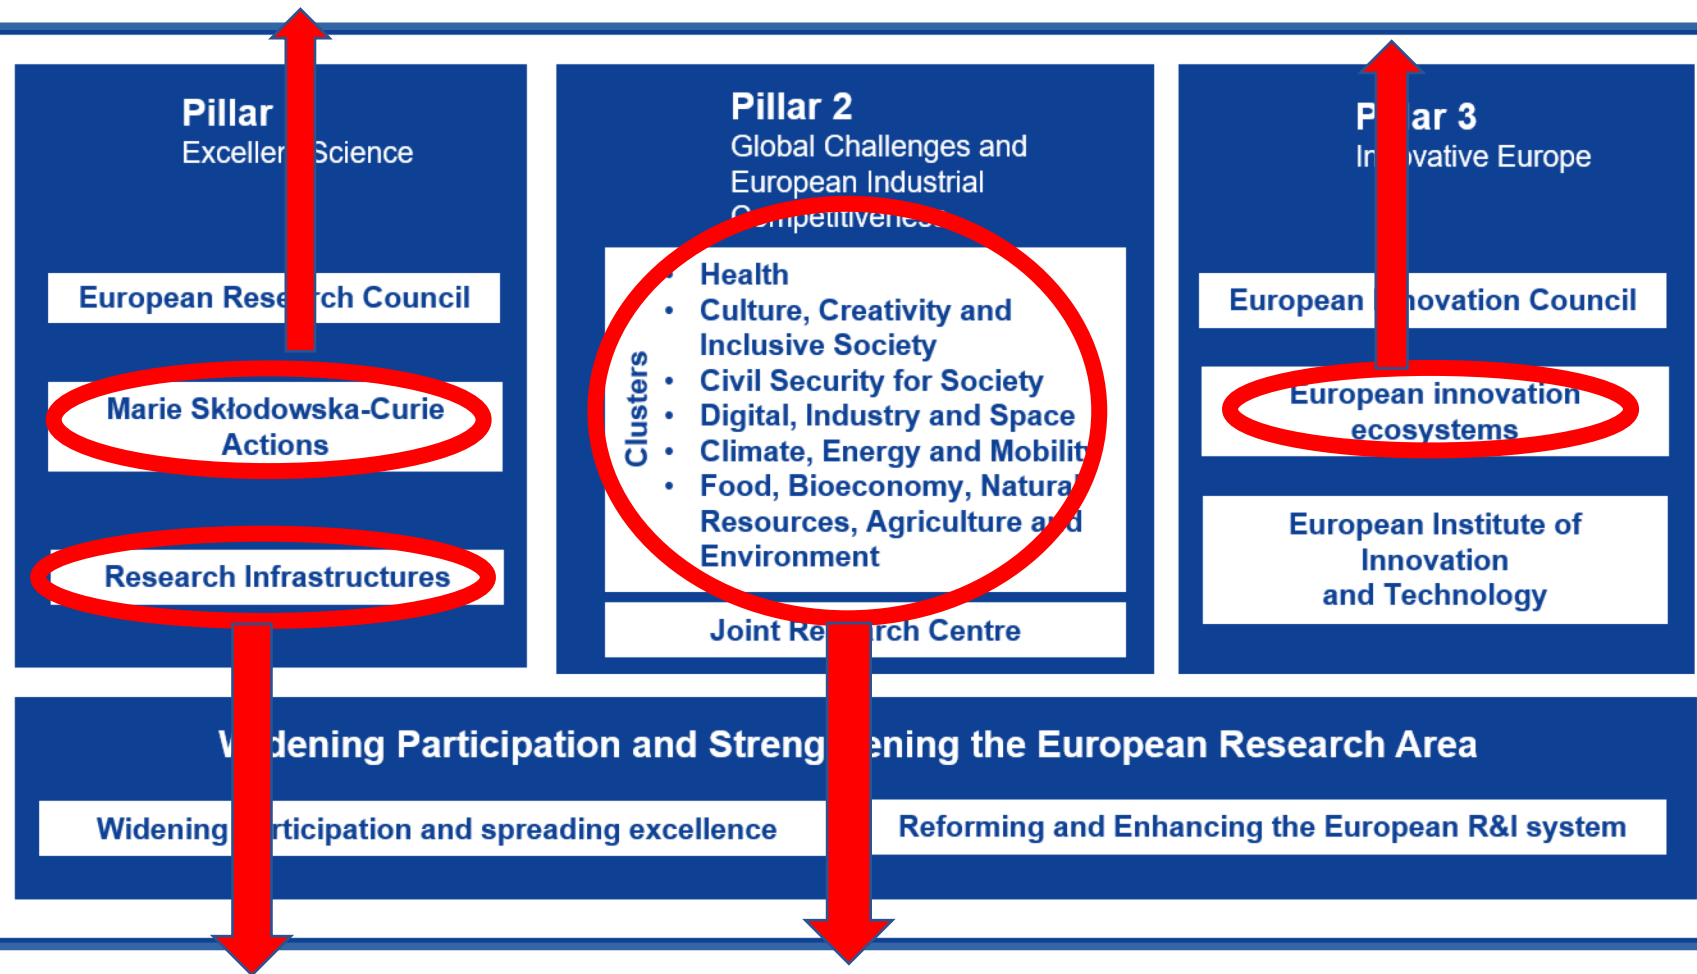

Horizon Europe and the possible new collaboratories in Catalonia.

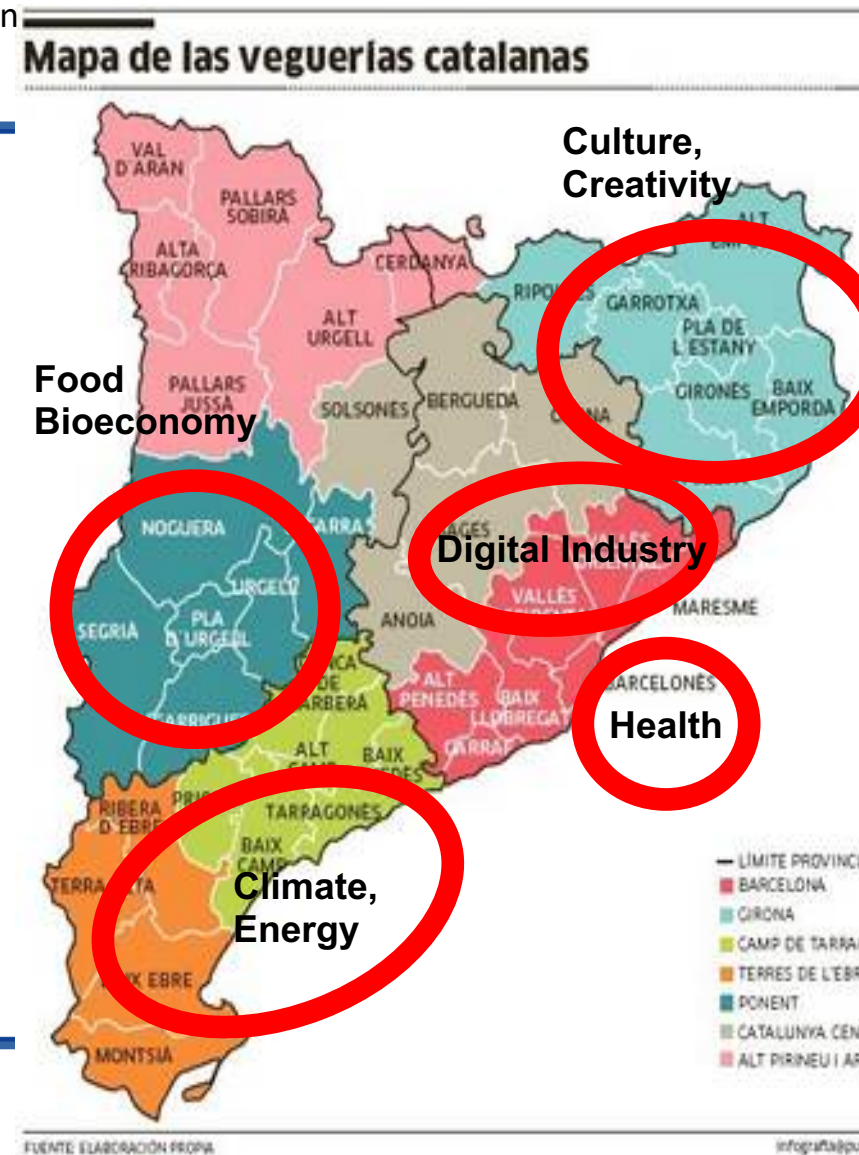

Collaboratories need training programs For upskilling their leaders

Collaboratories, can be the base of the new European innovation ecosystems.

Collaboratories need
Advanced Research Infrastructures
5G/IOT/Immersive Reality

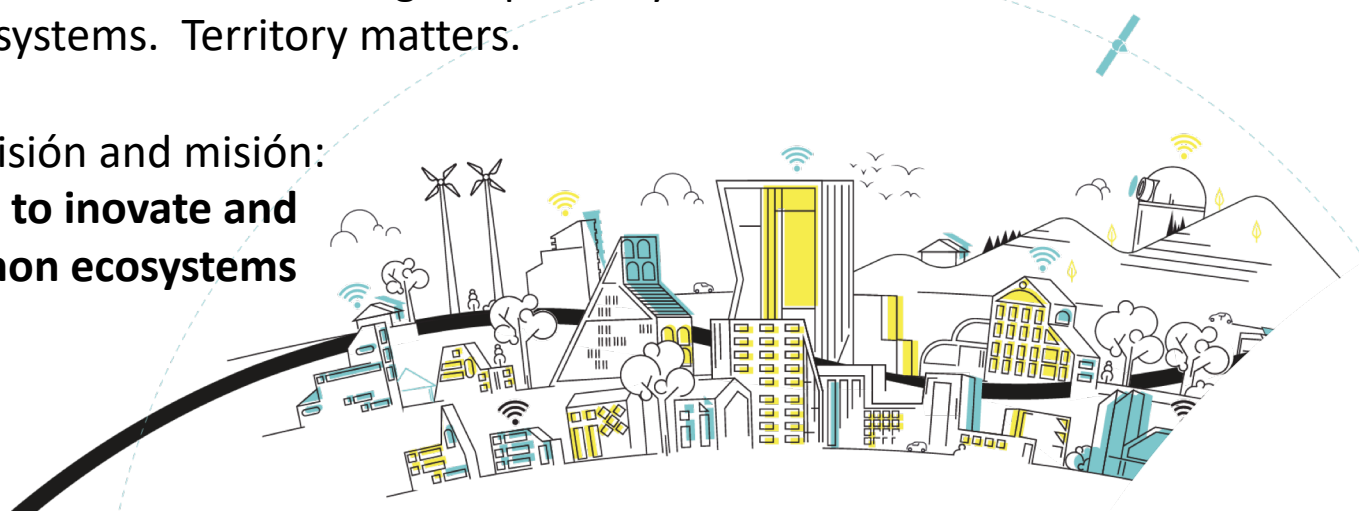

Collaboratoires need thematic specialization (health, climate,...) combined with digital and Social innovation. Digital is not reduced to Industry

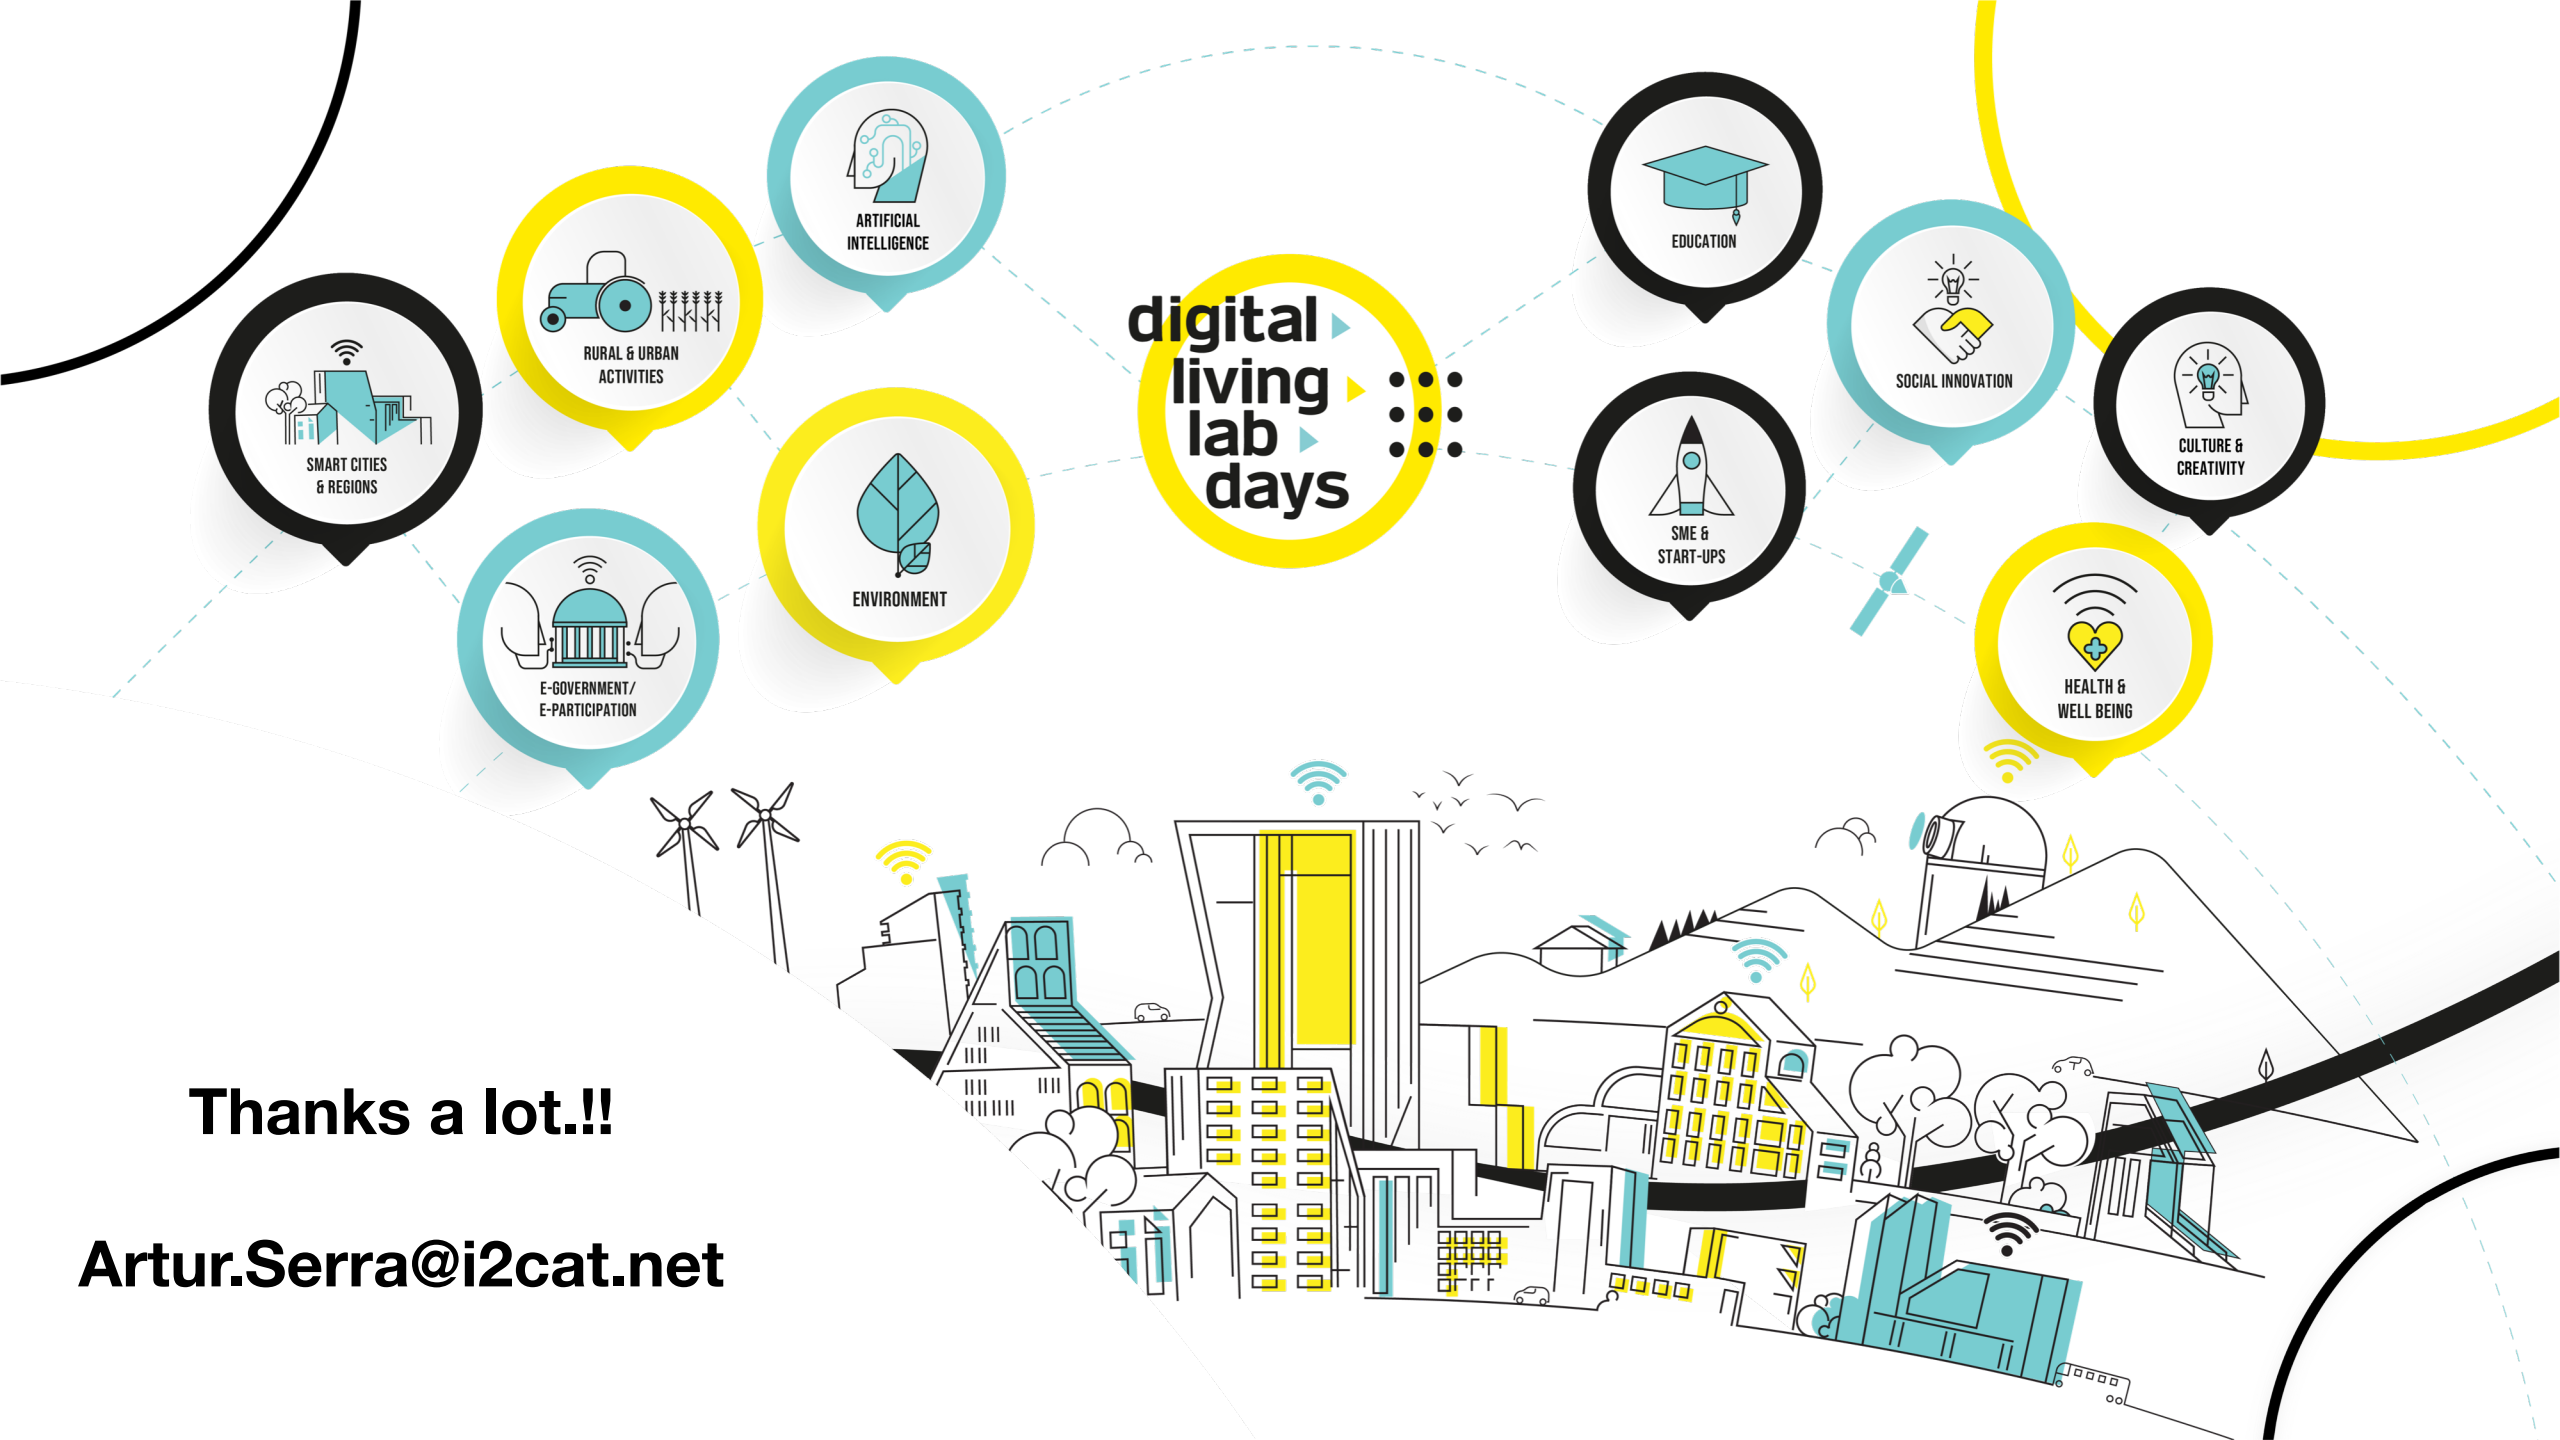

5. Some conclusions

What would be "The role of Living labs in supporting the development of universal access to social innovation ecosystems"?

1. Living labs should focus on solving **societal challenges** at the global and at the local level.
2. Doing that, living labs can lead the co-creation and co-building of social innovation ecosystems with partners organizations around the world like ESSI and others.
3. Collaboratories, o labs of labs, can be a good pathway to materizalize these new social/innovation ecosystems. Territory matters.
4. Do not forget our visión and misión:
**Empowering everone to inovate and
Building new inovatinon ecosystems**

Thanks a lot.!!
